

Size	Pannel
LENGTH	674 mm
WIDTH	551 mm
TOTAL THICKNESS	21 mm

Product description

Our Hexagon acoustic panels combine functionality with design. Thanks to their hexagonal shape, they can be arranged in creative ways, reducing reverberation and unwanted background noise while adding aesthetic value to any interior. Ideal for offices, meeting rooms, hospitality spaces, or residential environments where acoustic comfort and style go hand in hand. The panels are also designed to fit together perfectly.

Colors

This acoustic panel is available in one color:

HEXA - NATURAL

Materials

The hexagons are made from 9 mm black MDF panels. The MDF is finished with a wood veneer (oak). All of these hexagons have a diameter of 181.9 mm, with a 15 mm gap between them. The hexagons are mounted on a black acoustic felt base. This base is 12 mm thick and is made from 50% recycled materials.

Maintenance

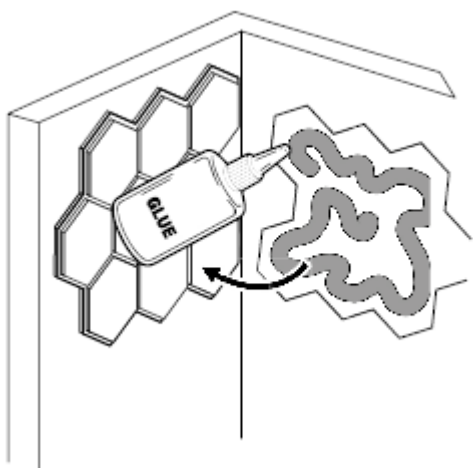

The panels can be easily cleaned with a duster or a hard-wrung towel. Caution: Always test on a small area before treating the entire surface.

Installation

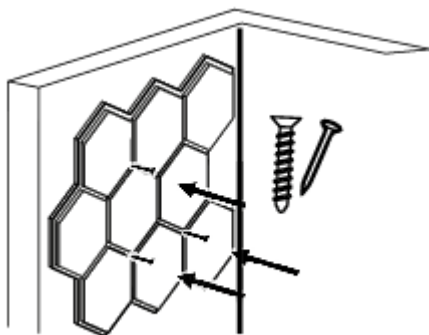

For more information, we refer to our installation guide.

Installation methods:

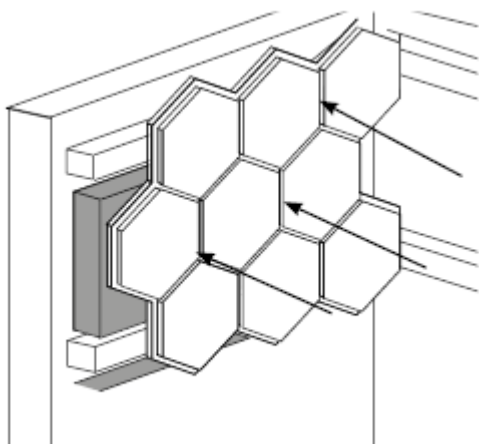

1. Direct gluing against the wall (wall must be flat, clean and dustfree), with MS polymer-based adhesive.

2. Use nails or screws to attach the panel directly to the wall. You can also use a nail gun.

- Use battens filled with glass or rock wool to improve sound absorption.

Overview of technical specifications

MODEL	Hexagonal wall panel made of wood veneer (oak)
PANEL SIZE	Length: 674 mm – Width: 551 mm – Thickness: 21 mm
MATERIALS	9 mm MDF + 12 mm polyester
PANEL DESIGN	Hexagons with a diameter of 181.9 mm, spaced 15 mm apart on the PET panel (see image below)
FINISH	Wood veneer (oak) – natural finish
FIRE RATING	D-s2,d0
DURABILITY	PET panel made from recycled materials FSC® certified
